

CADprofi 7.15

✓ Dynamic scaling of isometric symbols

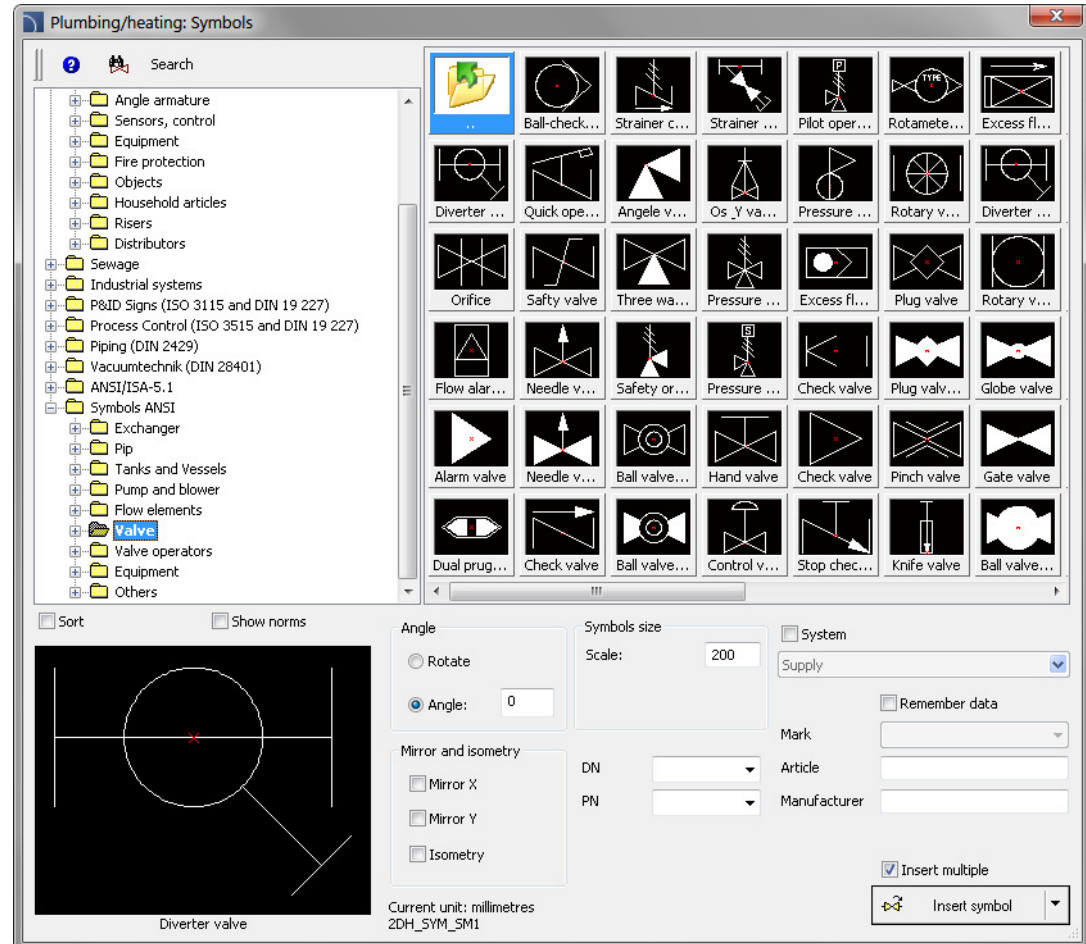

Command used for dynamic symbols editing has been extended with the possibility of scaling isometric symbols.

When you change size of symbols that were inserted in the cables then program automatically adjusts the connection points.

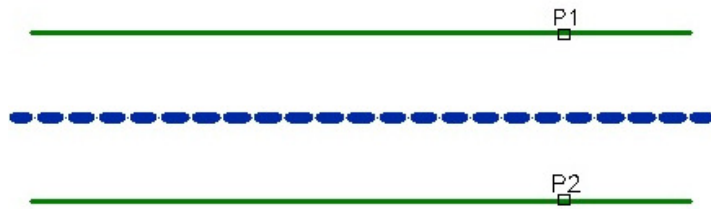

✓ ANSI symbols in HVAC & Piping module

For HVAC & Piping module we have added over 300 additional symbols according to ANSI standards.

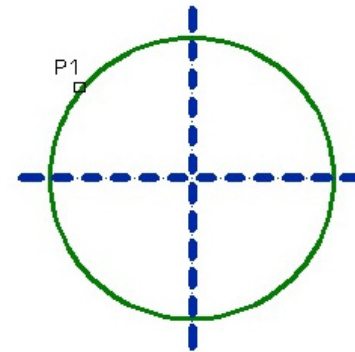

✓ Quick tools

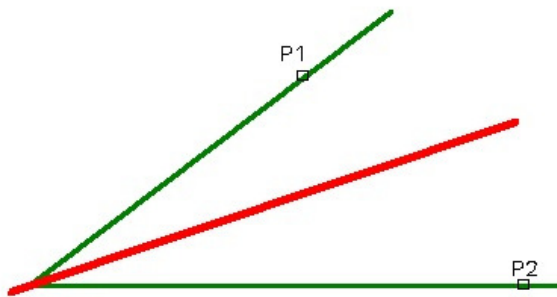

We have added four new commands to quickly draw the axis between the lines, circles axis, center marks and construction lines for bisector.

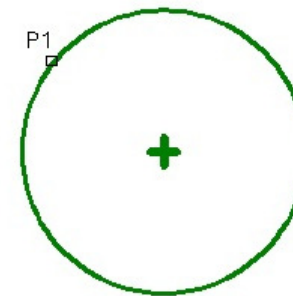

Axis between lines

Circle axis

Bisector

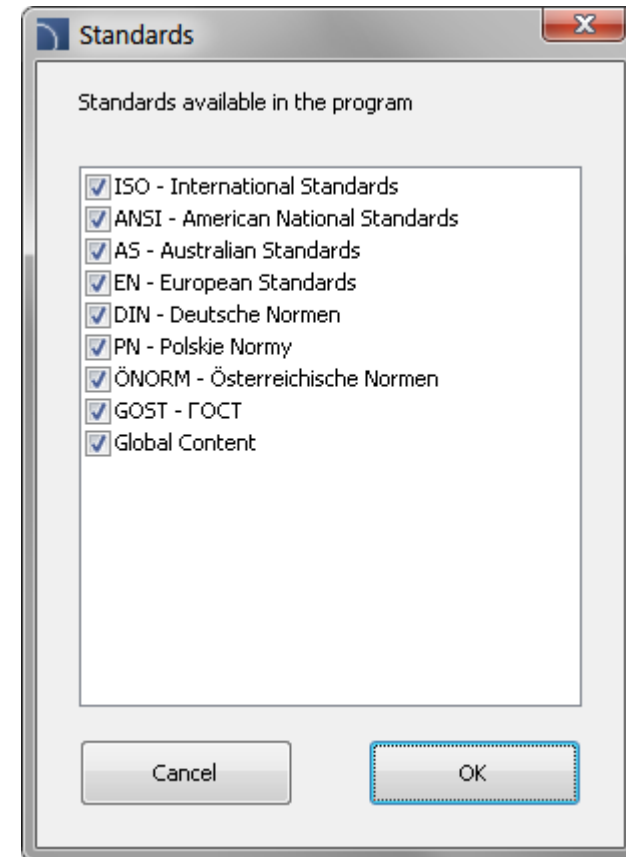

Center mark

✓ Mechanical standards update

Changes were made in mechanical standards database. Among other things, we have updated the filtering according to standards and we have introduced additional DIN standards.

CADprofi 7.15

✓ Works with GstarCAD 2011

Program has been adapted to work with the latest version of GstarCAD 2011.

CADprofi program works with many CAD programs: AutoCAD (since 2000 version), AutoCAD LT, Bricscad, GstarCAD, IntelliCAD, progeCAD, ZWCAD and many others.

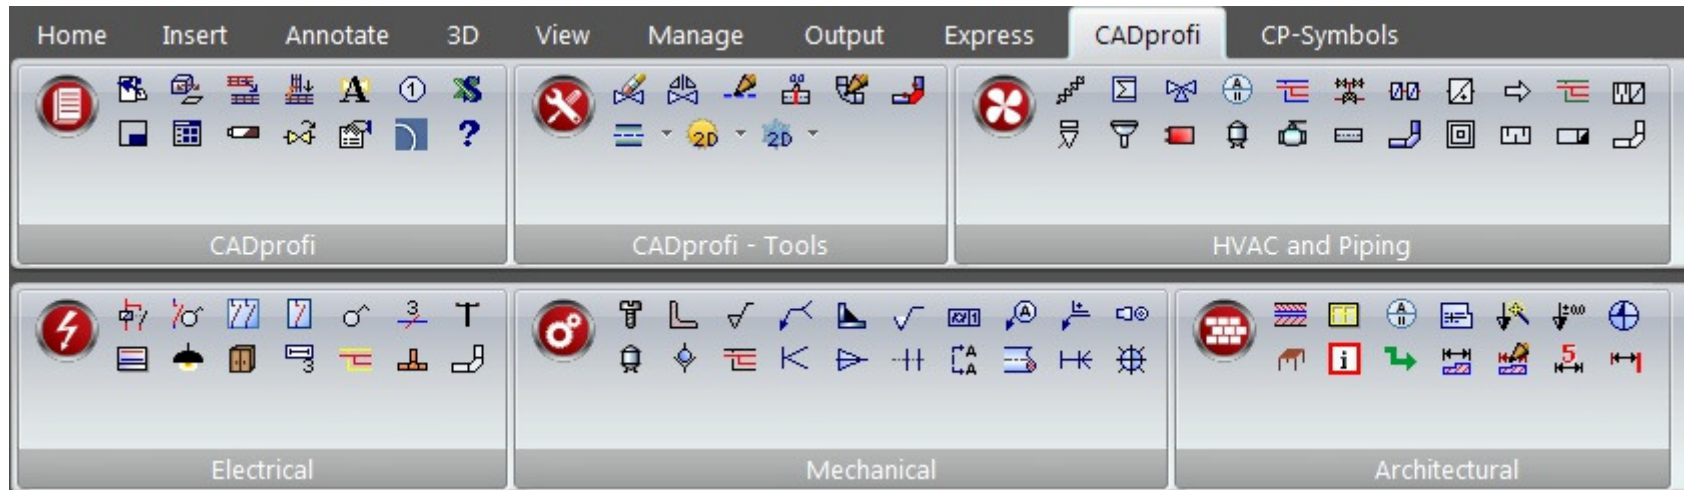

CADprofi 7.15

✓ New menu and ribbons

New menu has got rebuilt ribbons, new dropdown toolbars to run “quick tools” and easier layers management. Ribbons are available in AutoCAD (since 2009 version) and GstarCAD 2011.

CADprofi Ribbon in GstarCAD program.
